EXTRA-LONG BARRIERS
SECURITY BARRIERS

AS **AUTOMATIC**
SYSTEMS
LEBR GROUP

VEHICLES

PERFORMANCE

- Fast and smooth open/close cycles
- Sufficient torque for raising arms which are heavy, long or equipped with accessories
- Products designed for intensive use
- Intrinsic automatic opening mode in case of power supply failure
- Mechanical locking device for the arm, integrated in the housing

SIMPLICITY

- Easy installation and set-up, and reduced maintenance
- User-friendly control board (AS 1320)

MODULARITY

- Standard or anti-fraud arms
- Numerous options allowing high-level to very-high-level secured access (arms, tips, skirts, ...)
